International Union of Railways (UIC)

Allocation of Company Codes

16, rue Jean Rey

F - 75015 Paris or

- **send by e-mail to:**

oca@uic.org

Explanation and Instruction for Company code application

(According to UIC/OSJD leaflet 920-1)

General:

The purpose of the company code is to identify railway undertakings, infrastructure managers and companies involved in a Rail-Transport-Chain i.e. companies, directly or indirectly involved in rail traffic or having a business relationship with one or more of such companies like forwarders, other transport companies, wagon owners and even customers.

Codes are published on the Websites of UIC and OSJD. The UIC acting merely as issuer of codes, has no particular role in advising or judging their utilisation.

Inquiries can be addressed to the same address as the application forms.

Applicant / Company Information:

Please provide the complete legal name of the company as well as the acronym you want us to be registered. Also provide the complete mailing address for your main office. The officer responsible should be the person who officially applies for the codes and to whom all correspondence will be directed.

The company is fully responsible for the correctness of their information and should check the publication on the Websites. In case of errors or modifications the UIC/OSJD has to be notified immediately by e-mail by means of the official Company code update form to be downloaded from the UIC/OSJD Websites. The UIC/OSJD are not liable for errors.

Supplementary information of the request

The code utilisation could provide us with an indication on the objective and the character of the request.

If you need more codes it can be stated under the "comments" header (so you don't have to fill in an application for each code). If your company is a subsidiary of another company having already a company code, it can be stated here (see also "Regulations for company codes" on the UIC/OSJD Websites).

The signature

The signature has to be the one of the officer responsible. By signing the application, this officer accepts the conditions and the responsibility for the correctness of the information.
