

Developments and working status of the working group

UIC Leaflet 502-2

Currently the leaflet 502-2 is being adapted completely in order to operate internationally with oversized shipments using the profile system and only one Identification number.

International running certificate

Due to the fact that infrastructure managers and national railway authorities are more and more demanding running certificate for exceptional consignments of vehicles without authorization, we are working on a concept for running certificate including a checklist according to internationally valid standards.

Responsibility

Johann Braun
Chairman of the working group UIC 502
